### SCYNEXIS Inc.

#### SCY-078, a rare anti-fungal asset, funded through important data in 2016

**Our view:** SCY-078 remains a rare asset as an anti-fungal that addresses wild-type and resistant systemic fungal infections. The recently completed financing ensures sufficient cash well through the next set of catalysts, including in vitro and in vivo data in 2015 and Phase II and Phase I SCY-078 data in 2016. We continue to like shares given the unmet need targeted and favorable macro tailwinds.

#### Key points:

**Phase II oral step-down and Phase I intravenous SCY-078 studies ongoing and planned.** First patient in the Phase II oral step-down study started treatment in March, the enrollment goal is 120 patients across three arms, and the treatment period ranges between 3-10 days on the echinocandin and 14-28 days on SCY-078 or the azole (total is 17-38 days). The intravenous Phase I is expected to begin by YE:15. The key here is to be able to start patients on i.v. SCY-078 and then step-down to the oral version to optimize the commercial opportunity.

#### SCY-078 is a new mechanism of action targeting a high unmet need.

There are three commonly used drug classes used for treating systemic fungal infections, which can have mortality rates as high as 50%. However, SCY-078 belongs to a new class as an enfumafungin derivative. What is key here is resistance to existing drug classes, azoles and echinocandins is increasing, will likely to continue increasing as these drugs go generic and usage increases further, according to KOLs, nicely putting together the value proposition underlying SCY-078 and SCYX.

**2016 is important for data but 2015 should have updates too.** Enrollment in the Phase II study will be closely watched since it is post protocol amendments and establishes whether the data is available by mid-2016 (current guidance) or sooner. The i.v. Phase I should also read out by mid-2016. Combined these data could allow SCYX to seek approval of and initiate a pivotal Phase II/ III study in resistant organisms by YE:16/ early 2017, start a Phase III in systemic fungal infections, and make the drug available for testing in investigator sponsored studies.

**Marco tailwinds are highly favorable.** Anti-fungals benefit from all the tailwinds lifting antibiotics companies, such as QIDP designation, GAIN Act, etc. Furthermore, big pharma is re-engaged in the space both with newer R&D projects as well as acquisitions, such as CBST's take out by MRK (multiple parties were interested), DRTX's take out by ACT, and so on. We think long-term SCYX could fit in nicely with any hospital focused company that has an antibiotics sales force.

## Target/Upside/Downside Scenarios

Exhibit 1: SCYNEXIS Inc.

Source: Bloomberg and RBC Capital Markets estimates for Upside/Downside/Target

### Target price/base case

We value SCYX at \$18 per share, which includes US and ROW sales of SCY-078. We assign a probability of success of 65% and a value of ~\$7 per share to the US and \$11 per share to the ROW opportunity. We assume a US launch in 2019 and an ROW launch in 2020. Currently, we assume that SCYX will sell SCY-078 in the US and a partner will commercialize these compounds outside the US. We forecast peak SCY-078 sales of \$400-500MM in the US and \$1.3-1.4B in the ROW

### Upside scenario

Our upside scenario at \$34 (prev. \$36), includes ~\$17 per share in value for the US opportunity and ~\$17 per share in value for the ROW opportunity. We forecast peak SCY-078 sales of \$1.0-1.1B in the US and \$2.5-\$2.8B in the ROW. We assign SCY-078 a 65% probability of success, a discount rate of 15%, and use a terminal growth rate of -50%

### Downside scenario

Our downside scenario assumes that SCY-078 may not be successful clinically or commercially either because efficacy against resistant organisms was not borne out or it was not long lasting or an unexpected adverse event was seen. Under such a scenario shares would trade at roughly cash per share which is currently ~\$5.

## Investment summary

Scynexis' (SCYX) SCY-078 treats systemic fungal infections via a new mechanism of action that attacks the fungal cell wall, a validated target. These infections are serious, have high rates of mortality, and rates of resistance to current drugs are rising. All currently available drugs have limitations, which allow SCY-078 to generate an attractive value proposition. The worldwide market for systemic anti-fungals is nearly \$4B. Roughly 600,000 patients are identified with invasive fungal infections and an even higher number is treated. Phase I studies are completed for the oral version and in vitro and in vivo data shows activity in organisms both susceptible and resistant to currently approved drugs. Next up is a Phase II for the oral and a Phase I for the intravenous form with data in 2015. A Phase II/III study in resistant patients could start in 2016 and potentially provide a more rapid path to the market. SCYX essentially owns all rights to SCY-078, which is patent protected through 2030, as well as to its anti-fungal pipeline. This leaves SCYX free to commercialize the products itself, partner on a global or regional basis, and/or sell the company.

## Potential catalysts for SCYX shares

- **Phase II data for oral SCY-078 in 2015.** Important catalyst as this will be the first time SCY-078 will be used in human patients.
- **Phase I data for intravenous SCY-078 in 2015.** Important as an intravenous does not yet exist and is needed to maximize the value of SCY-078 franchise.
- **Phase II/III trial design in 2015/2016.** A sign off from the FDA could determine the pace and potential path to the market.
- **Phase II/III trial start in 2016 and data by YE:17/ early 2018.** A Phase II/III study in drug resistant patients could be the first proof that SCY-078 can achieve in patients what it is designed to do and has shown in in vitro and in vivo models.
- **Business development activities in 2015.** Non-core pipeline assets and even SCY-078 could be partnered opportunistically raising non-dilutive capital.

## Risks to our investment thesis

- **Clinical studies for oral and intravenous SCY-078 could fail.** Expectations are based on pre-clinical and Phase I data and human studies could show a lack of efficacy or emergence of resistance.
- **Merck returned rights for SCY-078 back to SCYX.** This raises the question of whether MRK saw anything in SCY-078's clinical or commercial profile that was lacking.
- **Sales ramp of SCY-078 could lag expectations** unless rates of resistance continue to rise.
- **SCYX could fail to find a partner** outside the US for SCY-078.
- **Timelines are rapid and any delays could disappoint investors.**

## Valuation

We value SCYX at \$18 per share, which includes US and ROW sales of SCY-078. We assign a probability of success of 65% and a value of ~\$7 per share to the US and \$11 per share to the ROW opportunity. We assume a US launch in 2019 and an ROW launch in 2020. Currently, we assume that SCYX will sell SCY-078 in the US and a partner will commercialize these compounds outside the US. We forecast peak SCY-078 sales of \$300-400MM in the US and \$1.0-1.4B in the ROW. We currently assign no additional value to the earlier stage pipeline. Finally, we assume product sales extend into 2030 and include a terminal value based on a terminal growth rate of -50% and a discount rate of 15%

## Price target impediments

Our price target is dependent solely on the clinical, regulatory and commercial success of SCY-078. A Phase II study for SCY-078 is expected in 2015 and data expected in 2016. Failure to demonstrate efficacy or safety in the study would be a significant setback. Furthermore, any setbacks in regulatory approvals in the US or EU, delay in launch, failure to secure a partnership outside the US for SCY-078, increased competition or other limitations to the market potential of these products either due to better efficacy and/or safety outcomes or pricing pressure due to the availability of generic drugs for glaucoma, could negatively impact our valuation.

### Explanation of RBC Capital Markets Equity rating system

An analyst's 'sector' is the universe of companies for which the analyst provides research coverage. Accordingly, the rating assigned to a particular stock represents solely the analyst's view of how that stock will perform over the next 12 months relative to the analyst's sector average. Although RBC Capital Markets' ratings of Top Pick (TP)/Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis.

#### Ratings

**Top Pick (TP):** Represents analyst's best idea in the sector; expected to provide significant absolute total return over 12 months with a favorable risk-reward ratio.

**Outperform (O):** Expected to materially outperform sector average over 12 months.

**Sector Perform (SP):** Returns expected to be in line with sector average over 12 months.

**Underperform (U):** Returns expected to be materially below sector average over 12 months.

#### Risk Rating

As of March 31, 2013, RBC Capital Markets suspends its Average and Above Average risk ratings. The **Speculative** risk rating reflects a security's lower level of financial or operating predictability, illiquid share trading volumes, high balance sheet leverage, or limited operating history that result in a higher expectation of financial and/or stock price volatility.

## Distribution of ratings

For the purpose of ratings distributions, regulatory rules require member firms to assign ratings to one of three rating categories - Buy, Hold/Neutral, or Sell - regardless of a firm's own rating categories. Although RBC Capital Markets' ratings of Top Pick(TP)/ Outperform (O), Sector Perform (SP), and Underperform (U) most closely correspond to Buy, Hold/Neutral and Sell, respectively, the meanings are not the same because our ratings are determined on a relative basis (as described below).

## Dissemination of research and short-term trade ideas

RBC Capital Markets endeavors to make all reasonable efforts to provide research simultaneously to all eligible clients, having regard to local time zones in overseas jurisdictions. RBC Capital Markets' equity research is posted to our proprietary website to ensure eligible clients receive coverage initiations and changes in ratings, targets and opinions in a timely manner. Additional distribution may be done by the sales personnel via email, fax, or other electronic means, or regular mail. Clients may also receive our research via third party vendors. RBC Capital Markets also provides eligible clients with access to SPARC on the Firms proprietary INSIGHT website, via email and via third-party vendors. SPARC contains market color and commentary regarding subject companies on which the Firm currently provides equity research coverage. Research Analysts may, from time to time, include short-term trade ideas in research reports and / or in SPARC. A short-term trade idea offers a short-term view on how a security may trade, based on market and trading events, and the resulting trading opportunity that may be available. A short-term trade idea may differ from the price targets and recommendations in our published research reports reflecting the research analyst's views of the longer-term (one year) prospects of the subject company, as a result of the differing time horizons, methodologies and/or other factors. Thus, it is possible that a subject company's common equity that is considered a long-term 'Sector Perform' or even an 'Underperform' might present a short-term buying opportunity as a result of temporary selling pressure in the market; conversely, a subject company's common equity rated a long-term 'Outperform' could be considered susceptible to a short-term downward price correction. Short-term trade ideas are not ratings, nor are they part of any ratings system, and the firm generally does not intend, nor undertakes any obligation, to maintain or update short-term trade ideas. Short-term trade ideas may not be suitable for all investors and have not been tailored to individual investor circumstances and objectives, and investors should make their own independent decisions regarding any securities or strategies discussed herein. Please contact your investment advisor or institutional salesperson for more information regarding RBC Capital Markets' research.

The information contained in this report has been compiled by RBC Capital Markets from sources believed to be reliable, but no representation or warranty, express or implied, is made by Royal Bank of Canada, RBC Capital Markets, its affiliates or any other person as to its accuracy, completeness or correctness. All opinions and estimates contained in this report constitute RBC Capital Markets' judgement as of the date of this report, are subject to change without notice and are provided in good faith but without legal responsibility. Nothing in this report constitutes legal, accounting or tax advice or individually tailored investment advice. This material is prepared for general circulation to clients and has been prepared without regard to the individual financial circumstances and objectives of persons who receive it. The investments or services contained in this report may not be suitable for you and it is recommended that you consult an independent investment advisor if you are in doubt about the suitability of such investments or services. This report is not an offer to sell or a solicitation of an offer to buy any securities. Past performance is not a guide to future performance, future returns are not guaranteed, and a loss of original capital may occur. RBC Capital Markets research analyst compensation is based in part on the overall profitability of RBC Capital Markets, which includes profits attributable to investment banking revenues. Every province in Canada, state in the U.S., and most countries throughout the world have their own laws regulating the types of securities and other investment products which may be offered to their residents, as well as the process for doing so. As a result, the securities discussed in this report may not be eligible for sale in some jurisdictions. RBC Capital Markets may be restricted from publishing research reports, from time to time, due to regulatory restrictions and/or internal compliance policies. If this is the case, the latest published research reports available to clients may not reflect recent material changes in the applicable industry and/or applicable subject companies. RBC Capital Markets research reports are current only as of the date set forth on the research reports. This report is not, and under no circumstances should be construed as, a solicitation to act as securities broker or dealer in any jurisdiction by any person or company that is not legally permitted to carry on the business of a securities broker or dealer in that jurisdiction. To the full extent permitted by law neither RBC Capital Markets nor any of its affiliates, nor any other person, accepts any liability whatsoever for any direct or consequential loss arising from any use of this report or the information contained herein. No matter contained in this document may be reproduced or copied by any means without the prior consent of RBC Capital Markets.
