ABOUT COMPANY AND PIPELINE OVERVIEW REPORT

Thomson Reuters provides the knowledge, tools, and expertise to help support drug discovery and development activities, IP portfolio optimization, identification of licensing and partnering opportunities, delivery of successful regulatory submissions, and the ability to keep current with the rapidly-changing pharmaceutical and chemical markets, supporting informed, early decisions.

This report was created by Thomson Reuters, using information from *Thomson Reuters Cortellis™ for Competitive Intelligence*; a comprehensive, proven intelligence solution that leverages the most accurate, complete, and widely respected drug pipeline information. From drug discovery and development activities to patent reports, the latest deals, and partnering opportunities, *Cortellis* can provide the confidence to make the most informed business decisions, faster. *Cortellis for Competitive Intelligence* provides accurate and validated information on pharmaceutical and biotechnology companies globally, their drug pipelines, deals, patents, and clinical trials, plus breaking industry news and conference coverage. All contained in one simple, highly intuitive research platform.

Cortellis Company and Pipeline Overview reports are the first in a series of reports that track pharmaceutical and biotechnology companies worldwide. Further report offerings planned to follow include: Company Detailed Pipeline and Company Competitive Landscape reports. All *Cortellis for Competitive Intelligence* content is subject to the most comprehensive editorial review process available, conducted by scientists, pharma professionals, regulatory experts, and generics specialists. Featuring timely drug pipeline information expertly uncovered and integrated from a significant number of global meetings each year, you'll always be on top of the latest developments.

Chosen by leading life sciences companies, their executives and investors, *Cortellis for Competitive Intelligence* accelerates your deal-making and gives you timely insights on the development landscape.

Discover undiscovered opportunities in drug development and licensing faster with *Thomson Reuters Cortellis™ for Competitive Intelligence*

DISCLAIMER

The information contained in this report is based on sources believed to be correct but Thomson Reuters does not guarantee the accuracy, timeliness, or completeness of this information. Opinions, if any, are those held by the author of any individual report or article at the time of initial publication and do not necessarily reflect the views of Thomson Reuters.

Information in this report on companies is intended for reference use only, and does not constitute a recommendation to buy or sell any particular security or other investment and does not constitute an offer to buy from or sell to any particular investor. Any company or securities mentioned in this report may not be suitable for any particular investor, depending on that investor's financial position and needs.

GLOSSARY

Number of Drugs in Active Development

Number of drugs associated with the company or subsidiary that are currently in active development, i.e. the development status for the drug(s) is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Number of Inactive Drugs

Number of drugs associated with the company or subsidiary that are currently classified as inactive, i.e. where the development status for the drug(s) is one of the following: No Development Reported, Discontinued, or Withdrawn.

Number of Patents as Owner

Number of patents associated with the company where the company is listed as owner; i.e. the relationship type (or way the patent refers to the company) is: Patent Assignee/Owner, Patent owner (not assignee), Licensee for development and marketing, Licensee – marketing only (Distributor), Patent assignee of family member, Inferred assignee.

Number of Patents as Third Party

Number of patents associated with the company where the company is listed as third party; i.e. the relationship type (or way the patent refers to the company) is: Patent assignee (not owner), Ex-Licensee for development and marketing, Ex-Licensee marketing only (Distributor), Customer of technology, Ex-Customer of technology, Patent opponent or infringer, Affiliate organization of inventor, Owner of underlying technology.

Patents summary table

This table represents a summary of the core patent coverage for this company covering Therapeutic EP, US and WO patents since 1990 only.

Number of Deals

A count of deals where the company or one of its subsidiaries is the primary company.

Key Indications

Displays top ten key indications for the company and its subsidiaries based on frequency (indications occurring with high and identical frequency are always included, and this may result in more than ten Key Indications being listed). Includes both indications associated with patents where the company is patent owner and indications associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

Key Target-based Actions

Displays top ten key target-based actions for the company and its subsidiaries based on frequency (actions occurring with high and identical frequency are always included, and this may result in more than ten Key Target-based Actions being listed). Includes both target-based actions associated with patents where the company patent owner and target-based actions associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended. A target-based action is one that is associated with a target.

Key Technologies

Displays top ten key technologies for the company and its subsidiaries based on frequency (technologies occurring with high and identical frequency are always included, and this may result in more than ten Key Technologies being listed). Includes both key technologies associated with patents where the company relationship is patent owner and key technologies associated with drugs in active development. A drug is classified as 'active' if it features on a row (or rows) in the current development status table where the status is one of the following: Discovery, Clinical, Phase I, Phase II, Phase III, Pre-registration, Registered, Launched, or Suspended.

PLEASE NOTE: the financials section where present in the report includes: Share Information, Stock Performance chart (including the consensus recommendation), and Major Shareholders. Financial Performance presents graphical and tabular data on Worldwide Sales, Operating Income and Net Income over time, together with a Quarterly earnings update. Balance Sheet lists Assets, Liabilities and Stockholders Equity, and Forecasts includes: EPS Forecast and Other Forecasts. The data reported in all sections (except share information and major stock holders) are correct as of the publication date of the report (and not the download date). For share information and major stock holders the data is correct for the date shown with these sections

Vitae Pharmaceuticals Inc

COMPANY OVERVIEW

Company Name	Vitae Pharmaceuticals Inc
Parent Company Name	Vitae Pharmaceuticals Inc
Website	http://www.vitaepharma.com/
Country	US
Number of Drugs in Active Development	7
Number of Inactive Drugs	10
Number of Patents as Owner	57
Number of Patents as Third Party	2
Number of Deals	6
Key Indications	Alzheimers disease,Hypertension,Glaucoma,Atherosclerosis,Metabolic syndrome X,Non-insulin dependent diabetes,Autoimmune disease,Cognitive disorder,Dermatological disease,Anxiety disorder
Key Target-based Actions	Beta secretase 1 inhibitor,Liver X receptor beta agonist,11-Beta hydroxysteroid dehydrogenase 1 inhibitor,Renin inhibitor,Liver X receptor modulator,Retinoic acid receptor gamma antagonist,Beta secretase inhibitor,Aspartic protease inhibitor,Beta amyloid antagonist,HIV protease inhibitor,Plasmeypsin inhibitor,Retinoid Z receptor gamma antagonist
Key Technologies	Small molecule therapeutic,Oral formulation,Chemical intermediate,Crystalline form,Reductional synthesis,Salt synthesis,Stereochemical synthesis

COMPANY PROFILE

SUMMARY

Vitae Pharmaceuticals (formerly Concurrent Pharmaceuticals), based in Fort Washington, PA and founded in May 2001, is a clinical-stage biopharmaceutical company focused on innovative drug discovery and development of small molecules in the areas of chronic kidney disease, diabetes, atherosclerosis and Alzheimer's disease. In January 2005, the company changed its name from Concurrent to Vitae.

LICENSING AGREEMENTS

In May 2007, Quest licensed Vitae's selective retinoic acid receptor agonists and antagonists and rexinoids for cancer. Quest also acquired a technology platform, intellectual property and a small molecule library.

In May 2004, Concurrent acquired rights to certain of Allergan Inc's preclinical programs and its retinoid and rexinoid nuclear receptor research portfolio.

FINANCIAL

In September 2014, the company priced its initial public offering of 6,875,000 shares of common stock at \$8.00 per share and the underwriters were granted a 30-day option to purchase up to an additional 1,031,250 shares of common stock at the initial public offering price to cover any over-allotments. By that time, the shares began trading on NASDAQ global market under the ticker symbol "VTAE". Later that month, the offering was closed and the company planned to raise aggregate net proceeds of approximately \$48.4 million. In October 2014, the underwriters fully exercised their option to purchase the additional shares at \$8.00 each, and expected to raise net proceeds of approximately \$56 million.

In January 2012, the company secured a \$15 million senior credit facility from Oxford Finance and Silicon Valley Bank.

In October 2008, Vitae entered into a \$13 million loan agreement. The company planned to use the funds to support the initial clinical development of its renin inhibitor program and to support the ongoing development of its BACE program.

By August 2006, Vitae's investors included Prospect Venture Partners, Venrock Associates, New Enterprise Associates, Atlas Venture, Wellcome Trust, Intel Capital and Allergan Corporation.

[Return to Table of Contents](#)

In January 2005, Vitae secured \$34 million in equity financing, which would be used to accelerate the company's programs and to advance them into clinical trials.

In January 2004, Concurrent completed a series B preferred stock financing totaling \$15 million.

PRODUCT PORTFOLIO DRUGS

PLEASE NOTE: Highest status refers to highest development of that drug for one of the active companies

VTP-34072

Drug Name	VTP-34072
Key Synonyms	
Originator Company	Vitae Pharmaceuticals Inc
Active Companies	Boehringer Ingelheim Corp, Vitae Pharmaceuticals Inc
Inactive Companies	
Highest Status	Phase 2 Clinical
Active Indications	Non-insulin dependent diabetes, Metabolic syndrome X
Target-based Actions	11-Beta hydroxysteroid dehydrogenase 1 inhibitor
Other Actions	Hypoglycemic agent
Technologies	Oral formulation, Small molecule therapeutic
Last Change Date	13-Nov-2014

VTP-27999

Drug Name	VTP-27999
Key Synonyms	
Originator Company	Vitae Pharmaceuticals Inc
Active Companies	Vitae Pharmaceuticals Inc
Inactive Companies	GlaxoSmithKline plc
Highest Status	Phase 1 Clinical
Active Indications	Hypertension
Target-based Actions	Renin inhibitor
Other Actions	Antihypertensive
Technologies	Oral formulation, Small molecule therapeutic
Last Change Date	30-May-2014

[Return to Table of Contents](#)

VTP-37948

Drug Name	VTP-37948
Key Synonyms	
Originator Company	Vitae Pharmaceuticals Inc
Active Companies	Boehringer Ingelheim Corp, Vitae Pharmaceuticals Inc
Inactive Companies	
Highest Status	Phase 1 Clinical
Active Indications	Alzheimers disease
Target-based Actions	Beta secretase 1 inhibitor
Other Actions	Neuroprotectant, Nootropic agent
Technologies	Oral formulation, Small molecule therapeutic
Last Change Date	24-Oct-2014

VTP-38443

Drug Name	VTP-38443
Key Synonyms	
Originator Company	Vitae Pharmaceuticals Inc
Active Companies	Vitae Pharmaceuticals Inc
Inactive Companies	
Highest Status	Discovery
Active Indications	Atherosclerosis
Target-based Actions	Liver X receptor beta agonist
Other Actions	Antiarteriosclerotic
Technologies	Small molecule therapeutic
Last Change Date	09-Jul-2014
